# P-Series Differential Pressure, Pressure \& Temperature Switches 

## FEATURES

- Explosion Proof and Watertight Enclosure - N7 Models
- Easy-to-read scale for approximate setpoint indication ( $\pm 5 \%$ accuracy)
- Stainless steel internal parts
- Easy setpoint adjustment(s) capability
- Diaphragm-sealed piston actuator for long life is standard for most ranges

Ashcroft ${ }^{\circledR}$ switches and controls are highly reliable for your industrial and process applications. We begin with rock-solid designs, matching the most appropriate technology with the safety and reliability requirements of the applications. The materials of construction are specified to exacting standards, and product is built to last in the toughest applications. Our modern, responsive manufacturing facility is supported by an extensive network of stocking distributors and factory sales offices located in virtually every part of the world. Special application assistance is always just a telephone call away. The Ashcroft P-Series switch line is designed for uncompromising end user reliability and safety.

Die cast aluminum enclosure is available in NEMA 7/9 (explosion-proof enclosure Class I, Div. 1 \& 2, Groups B, C, \& D and Class II, Div. 1 \& 2, Groups E, F and G). Dual chamber design allows setpoint changes to be made safely even with power connected. Materials of construction have been selected for long life. A wide variety of precision switch elements are available to meet every application requirement, including hermetically sealed contacts for added reliability and safety. The actuators we use have been proven in more than twenty years of service in plants and mills throughout the world. Multiple features such as dual setpoints and adjustable deadbands are offered. Special designs are available for fire safety, limit control and other more stringent requirements. Ease of use is stressed to improve the reliability of the installation.

P-Series switches are currently being successfully used in refineries, chemical and petrochemical plants, water and sewage treatment plants, steel mills and other tough applications. Typical applications are on blowers, compressors, boilers, burners, turbines and reverse osmosis systems.

## Thermowells

Thermowells must be used on any application where the stem of the temperature switch may be exposed to pressure, corrosive fluids or high velocity. Additionally, the use of a thermowell permits instrument interchange or calibration check without disturbing or closing down the process.
Ashcroft temperature switches have bulb diameters to match $3 / 8^{\prime \prime}$ nominal bore thermowells. The bulbs have a sensitive portion length of 2 " which can be used with $21 / 2$ " " $U$ " dimensioned thermowells or longer. For maximum accuracy, a thermowell's " $U$ " dimension should be selected to permit complete immersion of the sensitive portion plus $1^{\prime \prime}$ when measuring the temperature of liquids; an extra 3 " should be allowed when measuring the temperature of gases.
Thermowell bushings should be used with remote mount temperature switches. We recommend the standard $3^{\prime \prime}$ bulb and code 69 Series bushings for use with any thermowell "U" dimension. A split rubber grommet allows easy installation and " S " dimension adjustment.

## P-Series Differential Pressure, Pressure \& Temperature Switches

## Temperature Switches

P-Series temperature switches feature a
SAMA Class II vapor pressure thermal system. This system provides quick, accurate response to process temperature changes with negligable ambient temperature effects. This is inherent in the design due to the precise relationship that exists between temperature
and pressure according to the vapor pressure laws. A wide selection of sensing bulb and armored capillary lengths are available. The vapor pressure system design features small bulb sizes, making installation easy and cost-effective.

All models feature $\pm 1 \%$ percent of span set point repeatability with very
high overtemperature ratings.
These standard designs perform well in applications where shock and vibration could be a problem and should be used with Ashcroft thermowells for bulb protection and ease of installation and maintenance.

## STANDARD TEMPERATURE RANGE SELECTION

APPROXIMATE DEADBAND

| NOMINAL RANGE |  | MAX. TEMP. ${ }^{\circ} \mathrm{F}$ | PTA ${ }^{(3)}$ | PTS ${ }^{(4)}$ |  |  |  | PTD ${ }^{(4)}$ |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | SWITCH ELEMENT |
| ${ }^{\circ} \mathrm{F}$ | ${ }^{\circ} \mathrm{C}$ |  | J,H | G | J,H | K,F | P | GG | JJ, HH | KK,FF | PP |
| -40 to 60 | -40 to 16 |  | 400 | 18-90 | 2-10 | 9-18 | 1-2 | 1-5 | 2-10 | 9-18 | 1-2 | 1-5 |
| 0 to 100 | -20 to 40 | 400 | 30-90 | 2-15 | 10-30 | 1-3 | 1.5-7 | 2-15 | 10-30 | 1.5-3 | 1.5-7 |
| 75 to 205 | 20 to 95 | 400 | 34-120 | 2-17 | 10-34 | 1.5-3.5 | 1.5-8 | 2-17 | 10-34 | 1.5-3.5 | 1.5-8 |
| 150 to 260 | 65 to 125 | 400 | 25-100 | 2.5-12 | 9-25 | 1-2.5 | 1-7 | 2.5-12 | 9-25 | 1-2.5 | 1-7 |
| 235 to 375 | 110 to 190 | 500 | 35-130 | 2-18 | 10-35 | 1-3.5 | 1.5-8 | 2-18 | 10-35 | 1-3.5 | 1.5-8 |
| 350 to $525{ }^{(6)}$ | 175 to 275 | 700 | 40-165 | 3-25 | 15-40 | 2-4.5 | 2.5-11 | 3-25 | 15-40 | 2-4.5 | 2.5-11 |
| 500 to 750 ${ }^{(5)}$ | 260 to 400 | 900 | 50-200 | 20-36 | 36-60 | 5-10 | 6-21 | 20-36 | 36-60 | 5-10 | 6-21 |

NOTES: 1 All deadbands are in ${ }^{\circ} \mathrm{F}$.
2 Switches can be set at increase or decrease throughout the nominal range.
3 Deadbands for PTA models are adjustable between the values shown

4 Deadbands for PTS and PTD models are fixed within the range of values shown. Manufacturing and parts variances result in variation from one unit to another as shown.
5 Available with remote mount thermal systems only.
6 Not available with $2^{3 / 4} 4^{\prime \prime}$ stem.

## P-Series Differential Pressure, Pressure \& Temperature Switches

## Pressure \& Differential Pressure Switches

$P$-Series pressure, differential pressure and vacuum switches use two different actuators depending on setpoint requirements. For setpoints between 2 and 3000 psi, the simple, rugged diaphragm- sealed piston actuator is used. This design features high reliability and a choice of actuator seal materials for virtually every application. An optional welded design is also available for setpoints up to 1000 psi
for maximum reliability. This design is available in 316 SS or Monel. Differential pressure models use a unique dual-diaphragm- sealed piston design that features very high static operating pressures and small size.
For setpoints between 4.5 and 150 inches of $\mathrm{H}_{2} \mathrm{O}$, a large diaphragm is used for increased sensitivity in both pressure and differential pressure designs with good choice
of materials of construction.
All standard models feature $\pm 1$ percent of range setpoint repeatability and a minimum of 400 percent of range proof pressures.

These standard designs perform well in applications where shock and vibration could be a problem and may be used with Ashcroft ${ }^{\circledR}$ diaphragm seals in extreme services such as slurries or abrasive process fluids.

## PRESSURE/VACUUM SWTCHES

## NOTES:

1 Switches may generally be set between $15 \%$ and $100 \%$ of nominal range on in-creasing pressure. Consult factory for appli-cations where set points must be lower.
2 All deadbands are given in English units as shown in the nominal range column.
Deadbands shown are for switches with Buna N diaphragm. Approximate deadbands for optional diaphragms:

[^0]

| M | MM | Low Level Gold Contacts | 1A, 125 Vac |
| $\mathrm{P}(3)$ | PP | Hermetically Sealed - AC | 5A, 125/250 Vac |
| U | UU | Manual Reset, Actuates on Increasing Pressure | 15A, 125/250 Vac $6 \mathrm{~A}, 130 \mathrm{Vdc}$ |
| W | WW | Ammonia Service | 5A, 125/250 Vac $6 \mathrm{~A}, 30 \mathrm{Vdc}$ |
| Y | YY | High Temperature $300^{\circ} \mathrm{F}$ Ambient | 15A, 125/250 Vac |
| S | SS | Heavy Duty - DC | 10A, 125 Vac or Vdc $1 / 8 \mathrm{HP}, 125 \mathrm{Vac}$ or Vdc |

## NOTES:

1 All thermal systems are 316 St. St.
2 Additional line lengths available, consult factory.
3 Additional bulb lengths available, consult factory.
4 Additional ranges available, consult factory
5 Estimated dc rating, 2.5A, 28Vdc (not UL listed).

6 Estimated dc rating, .4A, 120 Vdc (not UL listed).
7 Not UL listed at 480 Vac
8 See page 5 for thermowell application information
9 Standard on N4 enclosure.
10 Not available in 350/5250F range.

## P-Series Differential Pressure, Pressure \& Temperature Switches <br> Dimensions - P-Series

## Temperature Switch - Direct Mount

## Pressure Switch - psi Ranges

N4 - $5.0 \mathrm{lb} .(2.3)$
N7 - $5.6 \mathrm{lb} .(2.5)$

## Differential Pressure Switch - psid Ranges

## P-Series Differential Pressure, Pressure \& Temperature Switches <br> Dimensions - P-Series

Temperature Switch - Remote Mount

Pressure Switch - in. $\mathrm{H}_{2} \mathrm{O}$ Ranges

Differential Pressure Switch - Diff. in. $\mathrm{H}_{2} \mathrm{O}$ Ranges

[^0]:    Viton:
    Teflon:
    Stainless Steel:
    Monel:
    3 Deadbands for PPA and PDA models are adjustable between the values shown.

    Multiply Buna N value by 1.4
    Multiply Buna N value by 1.2
    Multiply Buna N value by 1.7
    Multiply Buna $N$ value by 1.7

    4 Deadbands for PPS, PPD, PDS and PDD models are fixed within the range of values shown. Manufacturing and parts variances result in variation from one unit to another as shown.
    5 Proof pressure is 4000 psi with SS and Monel welded diaphragms.
