

CLM100 • Cable Length Meter

Affordable and accurate cable length measurement!

For Distributors. . .

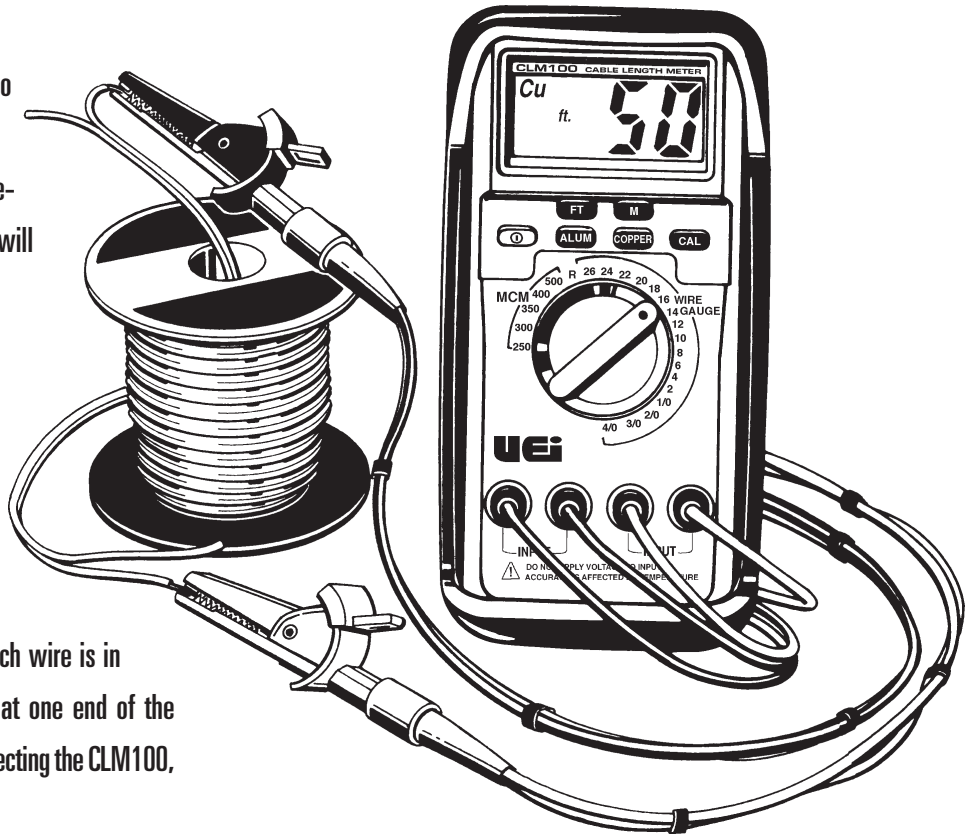

The CLM100 is the ideal tool for distributors who sell wire and cable. Use it to easily and quickly determine how much wire remains on a spool before despooling it for a customer. The CLM100 will make your inventory nightmares disappear.

For Contractors. . .

The CLM100 means cost savings. Now use partial spools with confidence, knowing there is adequate wire left for the job.

Sometimes contractors need to measure how much wire is in an existing conduit run. By shorting a wire pair at one end of the conduit run (with the power disconnected) and connecting the CLM100, the round trip distance can be easily measured.

The CLM100 comes complete with the AC504 carrying case, copper calibration bars, abrasive pad and test leads.

Specifications:

Length	15 to 30,000 feet
Wire Size	26ga -4/0ga 250 MCM - 500 MCM
Length Accuracy	$\pm(2\%$ reading +3 digits) 65° to 75°F $\pm(3\%$ reading +3 digits) below 65°/above 75°F
Temperature Compensation	Automatic
Resistance Range	0 to 65 ohms with 1 milliohm resolution
