High Accuracy, High Precision Power Analyzers

PA920/PA910 Power Analyzers

Vitrek's Most Powerful,
Accurate & Flexible Electrical
Power Analyzer, Providing
Ultra-High Accuracy (0.024%),
Faster Sampling Rates,
Bandwidth Performance and
Greater Harmonic Frequencies,
Yet Still Easy-To-Use and
Affordable.

Quality and Reliability

Vitrek, founded in 1990, is the premier source of precision power testing and measuring equipment for industrial and consumer product development and manufacturing. Vitrek's sophisticated technology provides companies the edge in design verification and product manufacturability.

30
Years Industry
EXPERTISE

Industry's Easiest-To-Use Power Analyzer - Vitrek's PA920/PA910 Series power analyzers are the industry's easiest-to-use power analyzer. Equipped with a full color touchscreen, the PA9xx enables users to quickly and easily setup configurations, custom screens and interface commands.

Maximize Flexibility - The PA920 power analyzer offers expanded power analysis capabilities. The PA920 offers 0.024% base power accuracy for all channel cards. Vitrek channel cards are user friendly, store their calibration data and can be quickly swapped in the field to meet your latest testing requirements. The PA920 also offers improved voltage and current self-heating adders over those of the PA900 series. In addition, the PA920/PA910 provides easy channel selection for the user while offering 100 full precision readings per second and measurement bandwidths sufficient to handle 5 MHz signals.

Maximum Results - For tackling tough power factor, low phase angle and high crest factor loads, the PA9xx power analyzers are unbeatable. Offering full performance for crest factors as high as 100:1, the PA9xx series provides superior power measurement capabilities for the toughest power measurement applications.

Maximum Performance in a Variety of Applications - Design engineers are under constant pressure to increase efficiency and reduce excess product power consumption down to the last mW. Challenging programs like LED and HID lighting, solar panel energy output, efficiency testing on inverters and PWM motor drive systems on electric vehicles—all require fast, precise, reliable power measurement. The unequalled performance of the Vitrek PA920 gives you the competitive advantage—the ability to accurately capture the power data you need in a flexibly, accurate, easy-to-use power analyzer.

Modular Design = Maximum Flexibility - The PA920 Series Power Analyzers are available in both pre-configured models or can be purchased in a custom configuration to provide the performance you need at a price that meets your budget.

PA920 Only Channel Cards for use with PA920 Mainframe (0.024% Accuracy)

UT Channel Card - Ultra-Precision Dual Shunt (1, 30A) Channel Card
UX Channel Card - Ultra-Precision External Current Transducer Input Channel Card
BT Channel Card - High Bandwidth Dual Shunt (1, 30A) Channel Card
BX Channel Card - High Bandwidth External Current Transducer Channel Card
KT Channel Card - Kilovolt (1.6kVrms Continuous) Dual Shunt (1, 30A) Channel Card
KX Channel Card - Kilovolt (1.6kVrms Continuous) External Current Transducer Input Channel Card
MT Channel Card - Motor Transducer Channel Card (Slot 4 only)

PA 910 Channel Cards for use with PA910 Mainframe (0.045% Accuracy)

VT Channel Card - Ultra-Precision Dual Shunt (1, 30A) Channel Card
VX Channel Card - Ultra-Precision External Current Transducer Input Channel Card
MT Channel Card - Motor Transducer Channel Card (Slot 4 only)

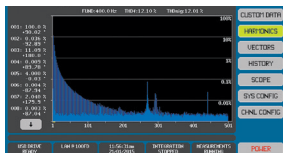

PA920/910

High Accuracy, High Precision Power Analyzers

Test Like You MEAN IT

CONDENSED FEATURES & BENEFITS

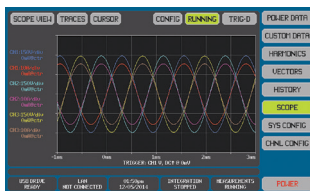

- > Easy-to-use color touchscreen for quick setup, measurement configuration, channel selection and use.
- > High Accuracy and frequency range 0.024% Power Accuracy, PA920 with VT card.
- > Supports a variety of compliance and environmental performance standards including:
 - EN60034-2-1:2014 (motor drives)
 - EN50564:2011 (standby power)
 - EN61000-3-2 and 3-12 and 4-7 (harmonics emissions)
 - RTCA DO-160/E/F/G (avionics)
 - Boeing 787B3-0147
 - Airbus ABD0100.1.8 (A380) and ABD0100.1.8.1 (A350)
- > Harmonics Screen displays up to 500 harmonics with fundamentals as high as 1.2 kHz. The chart can be set to show linear, relative linear, logarithmic or relative logarithmic amplitudes.

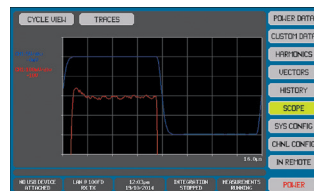

- > Power Data Screen is available with one touch to display V, A, W, VA, VAR and PF for any selected channel or group of channels. In addition, peak readings, phase, CF and other parameters are also available.

- > Scope Screen offers waveform acquisition and analysis similar to a digital scope. Up to six signals can be displayed each having user selectable scaling, offset and color.

- > Cycle View represents a single cycle of the voltage and/or current periodic waveforms. User selectable amplitude and scaling provides almost unlimited detail and visibility.

- > History Screen (bottom screen shown above) is a maintained continuous historical record of all non-harmonic measurement results and selected harmonics. Up to four user selectable parameters can be graphically displayed using the history screen.
- > Additional Screens are available, visit www.vitrek.com to view additional specifications and display screens.

For complete specifications visit www.vitrek.com.

PA920 ORDERING INFORMATION

PART #	DESCRIPTION
PA920	Ultra-Precision Power Analyzer Mainframe 4-channel capacity 0.024% Accuracy
UT	UT Channel Card - Dual Shunt (1, 30A)
UX	UX Channel Card - External Current Transducer Input Channel Card
BT	BT Channel Card - High Bandwidth Dual Shunt (1, 30A)
BX	BX Channel Card - High Bandwidth External Current Transducer Input Channel Card
KT	KT Channel Card - Kilovolt (1.6kVrms Continuous) Dual Shunt (1, 30A)
KX	KX Channel Card - Kilovolt (1.6kVrms Continuous) External Current Transformer Input Channel Card
MT	Motor Transducer Channel Card (Slot 4 only)

* For pre-configured models visit us online at www.vitrek.com

PA910 ORDERING INFORMATION

PART #	DESCRIPTION
PA910	Ultra-Precision Power Analyzer Mainframe 4-channel capacity 0.045% Accuracy
VT	VT Channel Card - Dual Shunt (1, 30A)
VX	VX Channel Card - External Current Transducer Input Channel Card
MT	MT Channel Card - Motor Transducer Channel Card (slot 4 only)
