

Description

This infrared thermometer has many features such as non-contact, fast response time, and safe use. The overall design of the instrument conforms to ergonomics to ensure the comfort of operation, a highly sensitive thermoelectric sensor is selected to ensure the accuracy of the measurement. Make it play an important role in your health monitoring. When this product is used for human body temperature measurement, it is only used as a reference for fever screening and cannot be used for medical identification.

Features

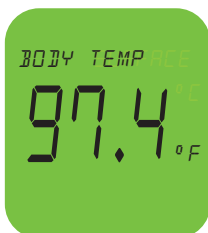

- Accurate measurement
- Automatically display of last measurement results
- Measurement record storage
- Temperature Abnormal Alarm
- Large Display
- Measurement in 1 second
- Switch Celsius / Fahrenheit
- Contactless Measurement

Specifications

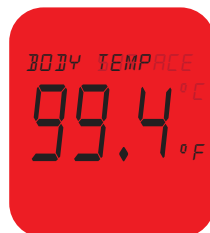

Thermometer Measurement:
L 5.9in * W 3.77in * H 1.69in

Body: 95F - 107.9°F
Surface: 32F - 212°F
Accuracy: $\pm 0.6^\circ\text{F}$
Resolution: 0.1°F
Measuring Distance: 1.1 inch to 2 inch
Working Voltage: DC3V (2 AA batteries)
Reaction time: 1.0 Seconds
Record Number: 10

DISPLAY:

Green: Below 99.32°F

Red: Above 99.32°F

- ROHS / CE / FDA

IMPORTANT: Always read and follow user instructions.
